**REVITALIZATION
PROJECT**

BRINGING HOPE AND HEALING TO AFRICA

THEN

65 years ago there was a vision to share the love of Christ and provide compassionate medical care.

The entire community has taken part in the restoration project.

NOW

PROGRESS REPORT

With your continued support, the revitalization will prepare the hospital for many years.

EGBE

Hospital serves a 100-mile radius of small towns and villages providing compassionate medical care and bringing hope to many suffering who have nowhere else to turn for health care, surgery or maternity needs. Simply stated, the hospital is a lifeline to over 500,000 people in the surrounding community

made up primarily of farmers, merchants, or cattle herders. Daily medical emergencies—a major vehicle accident resulting in near death for its passengers, a mother slipping into a coma during a difficult birth, or a life-threatening snake bite—would end in death without the Egbe hospital.

“From far and near many people came to have their babies born in Egbe Hospital, and those who were sick came for treatment. They call Egbe the town of Jesus. I give glory to God for His unfailing love to us in Egbe!” — Mary Adeoye

In 1952, Egbe Hospital in Nigeria opened its doors

—and opened a window of opportunity for ministry. Today, thousands of lives have been changed.

Egbe Hospital was founded by SIM (Serving in Mission, a non-denominational Protestant mission) missionaries Dr. George and Esther Campion. Over the years the hospital grew into a multi-service medical complex with a 75-bed facility on a 33-acre campus with 65 buildings.

In 1976, the medical complex was transferred by SIM to ECWA (Evangelical Church Winning All), a Nigerian mission organization.

PROGRESS. *The Egbe community, Nigerian businessmen, donors, volunteers, and missionaries are transforming the medical complex. Great progress has been made, but more is needed.*

THE VISION

REBUILD THE WALLS

"Come, let us rebuild the walls."

A shining light in rural Africa for 65 years... now in need of outside support in preparation for the next 60 years.

OUR MISSION

To be recognized as a self-sustaining Christian rural teaching hospital known for integrity, medical excellence, quality medical training, and compassionate patient care provided by committed staff who share the Gospel with all who come to the hospital.

"My whole family and I thank God for the hospital for all the miraculous healings."

-Esther Bosode Babawarun

THE STRATEGY

A Discovery Team was established in 2009, to develop a strategy to revitalize the hospital.

The team focused on building partnerships with SIM, Samaritan's Purse, and World Medical Mission to recruit doctors, build infrastructure, and fund additional medical equipment. By bringing in medical professionals and establishing best practices and standards in a remote area, the hospital will continue to serve as a beacon of hope and healing in the community for years to come.

Our Strategic Plan:

1. Work Alongside Experienced Partners
2. Recruit Professional Medical Staff
3. Rebuild Facilities and Upgrade Equipment
4. Implement Best Practices for Sustainability
5. Monitor operations via the internet and systems

A revitalized Egbe Hospital will ensure patients' critical medical needs are met, and doctors and staff are trained and equipped.

Egbe Hospital and College of Nursing

Message from the Revitalization Project Leader

Saving Lives with Hope and Healing

In most of Africa, when a child has malaria, dysentery, or appendicitis, it is almost a certain death sentence because there is no medical care for over 100 miles of treacherous roads.

Seventy years ago, a young doctor and his wife, a nurse, stepped out in faith against all odds to build a remote hospital in rural Egbe, Nigeria. Those first pioneers were my parents. Today, we have the awesome privilege of leading a project team to revitalize Egbe Hospital and the College of Nursing.

Our goal is to share the Gospel, bring medical excellence, compassionate care to the sick, and training to doctors, nurses and midwives, **bringing HOPE and HEALING for many years to come.** We are utilizing the power of technology in our medical equipment and documenting best practices to build a self-sustaining hospital for another 70 years.

The vision is enormous, and the progress is exciting. Through a unique partnership of volunteers, business leaders, missionaries, and churches, we are rebuilding, equipping, and staffing a team that cares for 1,600 patients monthly and performs life-saving surgeries. We are also rebuilding the College of Nursing for 300 students, and graduates will return to their villages. Generous donors have helped restore water and electricity and rebuilt the hospital--new pediatric ward and a dental clinic--the first in the region... And yet there is much more to do.

Join us in this adventure and ministry to those in need. Your support translates into hope, healing and the opportunity for thousands to experience God's love.

Making a lasting impact together.

Don Campion
Egbe Medical Mission

Old Hospital Laboratory

New Laboratory capable of performing 80 more tests.

The progress is amazing, but there is still much to do and it will take committed partners to reach our goals and vision.

PARTNERSHIPS ARE KEY TO THE VISION

The Egbe Hospital Revitalization Project is a partnership of individuals, churches, corporations, mission agencies, and health organizations. Join us in our commitment to "Rebuild the Walls" alongside some of those partnering with us now.

- Egbe Hospital invited the revitalization team to provide leadership for this project.
- SIM and Egbe Medical Mission are recruiting missionaries and providing administration oversight.
- Samaritan's Purse is recruiting medical missionaries and sourcing medical equipment.

To the world you may just be one person, but to one person you might be the world.

MORE PARTNERS ARE NEEDED TO ACHIEVE THE VISION

1. **REBUILD INFRASTRUCTURE:** Several facilities still need to be built on the 50-acre campus to meet the medical priorities.
2. **REPLACE MEDICAL EQUIPMENT:** Modern medical teaching aides and medical equipment is needed for diagnosis, treatment and training.
3. **RECRUIT EXPERIENCED STAFF:** Nigerian professionals and missionaries who can serve for two to five years are essential in the following positions:
 - Maintenance and Construction Manager
 - Surgeon
 - Nursing Director
 - Ophthalmologist
 - Dentist
 - Physicians
4. **IMPLEMENT BEST PRACTICES:** The hospital's sustainability into the future depends on clearly defined procedures and best operating practices.

Will you consider partnering your time or talent for the Egbe mission and vision?

HOW YOU CAN GET INVOLVED

Wherever your skills and interest may lie, we'd love the opportunity to explore together how God could use you in the revitalization of Egbe Hospital.

Specific ways you can help...

CONNECT

Help join us with people and organizations willing to support the project in their area of expertise..

GO

Join the team of missionaries and volunteers serving at Egbe.

GIVE

Donate funds for construction and medical equipment.

PRAY

Join the several hundred who gather daily at Egbe to pray for the revitalization project.

Please partner with us for much needed medical equipment, building materials, staff development, training aides, and print and audio Bibles.
